

DESERT

projects

Lighting Design must be planned in conjunction with the architecture and Interior design elements.

The "Art Layer" of lighting design is often overlooked leaving voids or harsh lighting effects that distract from the viewing pleasure of the collection and overall enjoyment of the home.

The Merlin Light® embraces the art in a way that no other lighting source can. Exact contour, even illumination and color correctness presents the art as the artist intended it to be viewed.

Your investment art collection will be enjoyed for years to come.
